

CSL thanks and congratulates all at Bradgate Property Management

Established 16 years ago I started with a small-classified advert in the Leicester Mercury advertising one property. The business has grown significantly and now operates from offices in Burbage, near Hinckley. Eight specialist lettings professionals manage almost 700 properties in the Leicestershire area, and it would appear all the hard work in the early days is paying off although it is important we all stay focused in what is a very competitive and turbulent industry.

CSL were very helpful when we first started the company and they supplied us with our first used copier. They also help us with our printing requirements through one of their Local digital print centres which we find invaluable.

We have now replaced our stand alone printers which are extremely costly to run. CSL have installed the new range of multifunctional products which are ideal for mono and colour printing of brochures, flyers and property lists with the added ability to scan and archive all of our office documents, saving space and time.

CSL have not only streamlined Bradgate's print requirements but also saved the company considerable printer related costs.
