

CSL now offer secure, on-demand remote access and support

CSL now offers its own version of LogMeIn Solution, free of charge, to all its contracted networked products. The LogMeIn Solution of on-demand remote connectivity and support is also available to CSL customers.

- Scanless access to your connected product
- Can eliminate the need for an engineers visit.
- Interactive fault finding.
- Instant user training.
- Keep downtime to a minimum
- CSL LogMeIn is offered FREE to all internet enabled contracted devices.

How it works

Our technical staff provide LogMeIn Solutions to deliver remote and user assisted support to access and manage computer and other internet enabled devices more effectively.

LogMeIn allows us to help rectify problems, carry out remote and instant online user training and very often eliminates the need to call, and wait, for a technician to visit your premises.
